

WHAT DO WE DO?

We are here for YOU!

In an age of connectivity across the globe, the Texas Airports Council (TAC) is working to build a network of airport executives to share ideas, educate communities, and promote general aviation across Texas.

- Host Airport 101 workshops to help managers maintain and promote their airports
- Promote airport activities
- Keep members informed of legislative issues that may affect the operational and economic stability of airports in Texas
- Represent member airports in matters that may affect their operations, economic benefits or standing in their communities
- Aid in the training of members utilizing online training with ANT N Digicast

Networking Across Texas

Did you know TAC has a Member Forum on our website where you can go to ask questions about Airport Management?

Visit our website and follow the “Forum” link under the “Members” tab. From there, you can create a topic with whatever you’d like to know more about and subscribe to see what others are adding to the discussion.

This is a great resource for sharing knowledge and finding out what other airports are doing for similar situations or issues. After all, we all want the best for our Texas Airports!

Making a difference one airport manager at a time

WHO WE ARE

We are airport managers, consultants, service providers and others that share in the love of aviation and would like to make the airport system in Texas the best it can be! Through networking and mentoring we can make it happen!

Please take a moment to attend our annual meeting during the Texas Aviation Conference or visit us online and see what TAC can do for you!

About Us

The Texas Airports Council (TAC) has recently changed it's non-profit status to a 501c6 so we can better serve our members.

By changing our status, TAC will be allowed to advocate for General Aviation with the State legislature and FAA concerning matters that effect Texas airports.

Member Benefits

TAC has been evolving over the last few years. We started with hosting our Airport 101 Workshops. Due to COVID, we now have monthly Airport Manager Roundtable discussions via Zoom. Here you can ask questions and learn about issues going on in the industry.

We will also hold the Airport 101 sessions via Zoom.

The website is the best place to find more information about membership and scheduled events. We encourage those that are considering becoming members to take part and see what membership is all about.

Each member can look up their status, verify when their membership is up for renewal, and pay all in one place. Members now also have access to AAAE /ANTN Digicast online training.

Members can access minutes and agendas of previous Board of Directors meetings and annual membership meetings. Our quarterly BOD meetings are also held via Zoom and notices of all meeting times and locations will be posted for members to attend if they so choose.

Executive Membership — \$100/year

Associate Membership — \$150/year

Student Membership — \$25/year
